Lavender Dry Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Fractionated coconut oil (or light jojoba oil)	90 g (3.2 oz)
Sweet almond oil	25 g (0.9 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Lavender essential oil	25-30 drops (about 1.25 g)

Method

- 1 Measure the fractionated coconut oil and almond oil directly into a clean glass bottle.
- 2 Add the vitamin E oil.
- 3 Add the lavender essential oil.
- 4 Cap tightly and shake gently for 15-20 seconds to combine.
- 5 Label with the date you made it.

Shelf life

6-12 months at room temperature, away from direct sunlight. No water in this recipe, so no preservative is needed — just keep the dropper or cap dry.

Tips

- Apply right after a shower, while skin is still damp, so the oil seals in water instead of just sitting on top.
- Swap the essential oil for any skin-safe scent you like — the base ratio stays the same.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Citrus Grove Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Fractionated coconut oil	70 g (2.5 oz)
Sweet almond oil	30 g (1.1 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Sweet orange essential oil	20 drops (about 1 g)
Grapefruit essential oil	15 drops (about 0.75 g)

Method

- 1 Measure the fractionated coconut oil and almond oil into a clean glass bottle.
- 2 Add the vitamin E oil.
- 3 Add the orange and grapefruit essential oils.
- 4 Cap tightly and shake gently for 15-20 seconds to combine.
- 5 Label with the scent and the date you made it.

Shelf life

6-12 months at room temperature, away from direct sunlight. No water in this recipe, so no preservative is needed — just keep the bottle cap dry.

Tips

- Citrus essential oils are phototoxic — avoid direct sun on treated skin for several hours after applying, or use this one at night.
- Shake before every use: the lighter and heavier oils can separate slightly on the shelf.

Before you make this

Contains citrus essential oils, which can increase skin sensitivity to sunlight. Do a patch test on your inner arm and wait 24 hours before applying over your whole body, and avoid direct sun exposure on treated skin for several hours.

Jojoba Rose Shimmer Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Jojoba oil	80 g (2.8 oz)
Apricot kernel oil	20 g (0.7 oz)
Geranium essential oil	20 drops (about 1 g)
Cosmetic-grade mica powder, rose-gold shade (optional)	1 g (about 1/4 tsp)

Method

- 1 Measure the jojoba and apricot kernel oils into a clean glass bottle.
- 2 Add the geranium essential oil and cap, shaking gently to combine.
- 3 If using mica, add it last and shake hard for 30 seconds — it won't fully dissolve, it suspends.
- 4 Label with the date made; shake before each use since the mica will settle.

Shelf life

6-12 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Use only mica labeled cosmetic-grade for skin, never craft or soap-dye mica — they're not held to the same purity standard.
- If the shimmer looks patchy on skin, you added too much — a little mica goes a long way in a clear oil base.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Warm Vanilla Almond Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Sweet almond oil	100 g (3.5 oz)
Fractionated coconut oil	15 g (0.5 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Skin-safe vanilla fragrance oil	5 g (1 tsp)

Method

- 1 Measure the almond oil and fractionated coconut oil into a clean glass bottle.
- 2 Add the vitamin E oil and the vanilla fragrance oil.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Let it rest for 24 hours before first use so the scent settles into the oil.

Shelf life

6-12 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Use a fragrance oil formulated for skin (not a candle-only fragrance oil) — candle fragrance isn't tested for leave-on skin use.
- This blend has no essential oil, so it's a gentle starting point if you're new to DIY body oils.

Eucalyptus Mint Cooldown Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Fractionated coconut oil	90 g (3.2 oz)
Grapeseed oil	25 g (0.9 oz)
Eucalyptus essential oil	20 drops (about 1 g)
Peppermint essential oil	10 drops (about 0.5 g)

Method

- 1 Measure the fractionated coconut oil and grapeseed oil into a clean glass bottle.
- 2 Add the eucalyptus and peppermint essential oils.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Apply to arms and legs after a workout for a cooling effect — avoid the face and any broken skin, since both oils can tingle.
- Keep away from pets: eucalyptus and peppermint essential oils are not safe for cats and dogs.

Before you make this

Eucalyptus and peppermint are strong essential oils. Do a patch test on your inner arm and wait 24 hours before using on your whole body, and keep this oil away from young children's faces and hands.

Argan Frankincense Night Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Argan oil	70 g (2.5 oz)
Sweet almond oil	30 g (1.1 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Frankincense essential oil	15 drops (about 0.75 g)

Method

- 1 Measure the argan and almond oils into a clean glass bottle.
- 2 Add the vitamin E oil and the frankincense essential oil.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Argan oil has a natural nutty smell of its own — frankincense layers well over it instead of fighting it.
- Best used at night: argan oil can feel rich for daytime wear under clothing.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Grapeseed Lemongrass Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Grapeseed oil	90 g (3.2 oz)
Fractionated coconut oil	25 g (0.9 oz)
Lemongrass essential oil	20 drops (about 1 g)
Lime essential oil	10 drops (about 0.5 g)

Method

- 1 Measure the grapeseed and fractionated coconut oils into a clean glass bottle.
- 2 Add the lemongrass and lime essential oils.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Grapeseed oil is light and absorbs fast, which makes this a good pick for humid climates.
- Lemongrass can irritate sensitive skin at full strength more than other oils — the dilution here is kept light on purpose; don't add extra drops.

Before you make this

Contains lime essential oil, which is phototoxic. Do a patch test on your inner arm, wait 24 hours, and avoid direct sun exposure on treated skin for several hours after applying.

Fragrance-Free Sensitive Skin Oil

Active time	5 min active, no cook time
-------------	----------------------------

Batch size	about 4 fl oz (120 ml)
------------	------------------------

Ingredients

INGREDIENT	AMOUNT
Sunflower oil	90 g (3.2 oz)
Joboba oil	25 g (0.9 oz)
Vitamin E oil	3 g (about 1/2 tsp), slows rancidity

Method

- 1 Measure the sunflower and jojoba oils into a clean glass bottle.
- 2 Add the vitamin E oil.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- No essential oil or fragrance at all here — a good base to hand to anyone who reacts to scented products.
- If you want a trace of scent later, you can add 5-10 drops of a gentle essential oil like chamomile to a small portion, rather than the whole bottle.

Spiced Chai Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Sweet almond oil	95 g (3.3 oz)
Fractionated coconut oil	20 g (0.7 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Cinnamon leaf essential oil	5 drops (about 0.25 g) — keep to this amount, cinnamon is a known skin irritant at higher doses
Clove bud essential oil	3 drops (about 0.15 g)

Method

- 1 Measure the almond and fractionated coconut oils into a clean glass bottle.
- 2 Add the vitamin E oil.
- 3 Add the cinnamon leaf and clove bud essential oils last, counting drops carefully.
- 4 Cap tightly and shake gently for 15-20 seconds to combine.
- 5 Label clearly with the date made and that it contains cinnamon.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Cinnamon leaf oil is one of the most irritating essential oils used on skin — don't be tempted to add more for a stronger scent.
- If you still feel warmth or tingling after the patch test, cut the cinnamon to 2-3 drops next batch.

Before you make this

Cinnamon leaf and clove bud essential oils are strong skin irritants even at small amounts. Do a patch test on your inner arm and wait 48 hours before using on your whole body, and never increase the drop counts above.

Rosehip Lavender Renewal Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Rosehip seed oil	60 g (2.1 oz)
Sweet almond oil	50 g (1.8 oz)
Vitamin E oil	3 g (about 1/2 tsp), slows rancidity
Lavender essential oil	20 drops (about 1 g)

Method

- 1 Measure the rosehip and almond oils into a clean glass bottle.
- 2 Add the vitamin E oil and the lavender essential oil.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Store in a dark or amber bottle if you have one — rosehip oil is sensitive to light.

Shelf life

6-12 months at room temperature, away from direct sunlight — rosehip oil oxidizes a bit faster than other carrier oils, so use it up within this window for the best texture and smell.

Tips

- Rosehip oil has a natural earthy-nutty smell; lavender softens it without masking it completely.
- If the oil starts smelling sharp or like crayons, it has gone rancid — toss it and make a fresh batch.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Coconut Vanilla Summer Glow Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Fractionated coconut oil	100 g (3.5 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Skin-safe vanilla fragrance oil	5 g (1 tsp)
Cosmetic-grade bronze mica powder (optional)	1 g (about 1/4 tsp)

Method

- 1 Measure the fractionated coconut oil into a clean glass bottle.
- 2 Add the vitamin E oil and vanilla fragrance oil.
- 3 If using mica, add it last and shake hard for 30 seconds to suspend it.
- 4 Label with the date made; shake before each use.

Shelf life

6-12 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Fractionated coconut oil stays liquid at room temperature (unlike regular coconut oil), so this pours easily even in a cool bathroom.
- Skip the mica for a plain glow-free version — the vanilla scent works either way.

Herbal Rosemary Mint Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Grapeseed oil	90 g (3.2 oz)
Sweet almond oil	20 g (0.7 oz)
Rosemary essential oil	15 drops (about 0.75 g)
Peppermint essential oil	10 drops (about 0.5 g)

Method

- 1 Measure the grapeseed and almond oils into a clean glass bottle.
- 2 Add the rosemary and peppermint essential oils.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- This blend is meant to feel invigorating, not sleepy — good for a midday application instead of bedtime.
- Rosemary essential oil is one many people are advised to avoid in pregnancy or with seizure disorders — check with a doctor if either applies to you.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Golden Shimmer Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Fractionated coconut oil	85 g (3 oz)
Sweet almond oil	25 g (0.9 oz)
Ylang ylang essential oil	10 drops (about 0.5 g)
Cosmetic-grade gold mica powder	2 g (about 1/2 tsp)

Method

- 1 Measure the fractionated coconut oil and almond oil into a clean glass bottle.
- 2 Add the ylang ylang essential oil.
- 3 Add the gold mica and shake hard for 30-45 seconds until it's evenly suspended.
- 4 Label with the date made; shake before every use since the mica settles on the shelf.

Shelf life

6-12 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Use only mica labeled cosmetic-grade and meant for skin — never a craft or candle mica, which isn't tested for skin contact.
- Pour a little into your palm first and rub hands together before applying, so the shimmer distributes evenly instead of landing in one streak.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Jasmine Silk Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Sweet almond oil	90 g (3.2 oz)
Jojoba oil	25 g (0.9 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Jasmine absolute essential oil	8 drops (about 0.4 g) — jasmine is strong and expensive, a little goes a long way

Method

- 1 Measure the almond and jojoba oils into a clean glass bottle.
- 2 Add the vitamin E oil.
- 3 Add the jasmine absolute, counting drops carefully.
- 4 Cap tightly and shake gently for 15-20 seconds to combine.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Jasmine absolute is one of the more costly essential oils — this low drop count still gives a noticeable, rich floral scent.
- Let the bottle rest a day before judging the scent strength; jasmine mellows and rounds out as it sits.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Sandalwood Amyris Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Jojoba oil	90 g (3.2 oz)
Fractionated coconut oil	20 g (0.7 oz)
Sandalwood essential oil	15 drops (about 0.75 g)
Amyris essential oil	10 drops (about 0.5 g)

Method

- 1 Measure the jojoba and fractionated coconut oils into a clean glass bottle.
- 2 Add the sandalwood and amyris essential oils.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Amyris is sometimes called 'poor man's sandalwood' — blending the two stretches a smaller amount of real sandalwood further without losing the woody base note.
- This scent reads unisex — a good one to offer as a gift without guessing a recipient's preference.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Winter Frankincense Myrrh Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Argan oil	60 g (2.1 oz)
Sweet almond oil	40 g (1.4 oz)
Frankincense essential oil	15 drops (about 0.75 g)
Myrrh essential oil	10 drops (about 0.5 g)

Method

- 1 Measure the argan and almond oils into a clean glass bottle.
- 2 Add the frankincense and myrrh essential oils.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- This deep, resinous scent pairs well with the richer feel of argan oil — a good pick for the driest winter months.
- Warm the bottle briefly between your palms before pouring in cold weather; both oils flow more easily at skin temperature.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Tropical Coconut Lime Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Fractionated coconut oil	95 g (3.3 oz)
Sweet almond oil	20 g (0.7 oz)
Lime essential oil	15 drops (about 0.75 g)
Skin-safe coconut fragrance oil	2 g (about 1/3 tsp)

Method

- 1 Measure the fractionated coconut oil and almond oil into a clean glass bottle.
- 2 Add the lime essential oil and coconut fragrance oil.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- This one is built for travel-size bottles — fractionated coconut oil won't solidify in a cool bag like regular coconut oil would.
- Apply the night before a beach day, or reapply in the evening, to work around the sun-sensitivity window from the lime oil.

Before you make this

Contains lime essential oil, which is phototoxic. Do a patch test on your inner arm, wait 24 hours, and avoid direct sun exposure on treated skin for several hours after applying.

Calming Chamomile Infused Body Oil

Active time 25 min active (includes a gentle warm infusion), no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Sunflower oil	90 g (3.2 oz)
Dried chamomile flowers	10 g (about 1/4 cup)
Jojoba oil	25 g (0.9 oz)
Lavender essential oil	10 drops (about 0.5 g)

Method

- 1 Combine the sunflower oil and dried chamomile flowers in a heatproof glass jar.
- 2 Set the jar in a saucepan with 1-2 in (2-3 cm) of water over the lowest heat, water not touching the jar's rim, and let it infuse for 20 min, checking occasionally that the water hasn't boiled off.
- 3 Remove from heat and let cool to room temperature, about 20-30 min.
- 4 Strain through a fine mesh strainer or cheesecloth into a clean bottle, pressing the flowers to get the last of the oil out.
- 5 Stir in the jojoba oil and lavender essential oil.
- 6 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Keep the water at a bare simmer, not a boil — overheating the oil can scorch the chamomile and turn the scent bitter.
- Strain thoroughly: any leftover plant material in the bottle can introduce moisture and shorten shelf life.

Before you make this

Chamomile is in the ragweed family and can trigger a reaction in people with ragweed allergies. Do a patch test on your inner arm and wait 24 hours before using on your whole body.

Muscle Relief Massage Oil Blend

Active time 5 min active, no cook time

Batch size about 8 fl oz (240 ml)

Ingredients

INGREDIENT	AMOUNT
Grapeseed oil	160 g (5.6 oz)
Sweet almond oil	60 g (2.1 oz)
Eucalyptus essential oil	15 drops (about 0.75 g)
Marjoram essential oil	10 drops (about 0.5 g)

Method

- 1 Measure the grapeseed and almond oils into a clean glass bottle or pump bottle.
- 2 Add the eucalyptus and marjoram essential oils.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Grapeseed oil has enough slip for massage work without feeling greasy, which is why it's the larger share of this blend.
- Warm the bottle in a cup of warm (not hot) water for a few minutes before a massage — cold oil straight from storage can feel jarring on bare skin.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using on your whole body, and avoid broken or irritated skin.

Rose Mosqueta Geranium Glow Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Rosehip seed oil (rosa mosqueta)	70 g (2.5 oz)
Apricot kernel oil	40 g (1.4 oz)
Geranium essential oil	20 drops (about 1 g)
Cosmetic-grade rose mica powder (optional)	1 g (about 1/4 tsp)

Method

- 1 Measure the rosehip and apricot kernel oils into a clean glass bottle.
- 2 Add the geranium essential oil.
- 3 If using mica, add it last and shake hard for 30 seconds to suspend it.
- 4 Store in a dark or amber bottle if you have one; shake before each use.

Shelf life

6-12 months at room temperature, away from direct sunlight — rosehip (rosa mosqueta) oil oxidizes faster than more stable carrier oils, so use within this window.

Tips

- Apricot kernel oil is lighter than rosehip alone, which keeps this from feeling heavy despite the rich base oil.
- Skip the mica for a clearer, faster-absorbing version — the geranium-rose scent still comes through.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Bergamot Fig Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Sweet almond oil	90 g (3.2 oz)
Fractionated coconut oil	25 g (0.9 oz)
Bergamot essential oil (bergapten-free / FCF, if available, is the lower-risk choice)	12 drops (about 0.6 g)
Skin-safe fig fragrance oil	3 g (about 1/2 tsp)

Method

- 1 Measure the almond and fractionated coconut oils into a clean glass bottle.
- 2 Add the bergamot essential oil and fig fragrance oil.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label clearly with the date made and a reminder to avoid sun after use.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Bergamot is one of the most phototoxic essential oils used in skincare — an FCF (furanocoumarin-free) version removes most of that risk if you can find one.
- This is best worn in the evening, when there's no risk of sun exposure before it fully absorbs.

Before you make this

Bergamot essential oil is strongly phototoxic and can cause burns or dark spots on skin exposed to sunlight or tanning beds within 12-24 hours of application. Do a patch test on your inner arm, wait 24 hours, and avoid any sun exposure on treated skin during that window.

Milk and Honey Dry Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Sunflower oil	90 g (3.2 oz)
Fractionated coconut oil	25 g (0.9 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Skin-safe milk-and-honey type fragrance oil	5 g (1 tsp)

Method

- 1 Measure the sunflower and fractionated coconut oils into a clean glass bottle.
- 2 Add the vitamin E oil and the fragrance oil.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Let it rest for 24 hours before first use so the scent settles in.

Shelf life

6-12 months at room temperature. No water or real honey in this recipe — the scent comes from a fragrance oil — so no preservative is needed.

Tips

- Real honey has enough water content that it doesn't belong in an anhydrous oil — this fragrance oil gives the same cozy scent without introducing water or needing a preservative.
- This is a mild, gentle scent profile, a good one to offer alongside stronger essential-oil blends for people who prefer something softer.

Patchouli Cedarwood Earth Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Jojoba oil	85 g (3 oz)
Grapeseed oil	25 g (0.9 oz)
Patchouli essential oil	15 drops (about 0.75 g)
Cedarwood essential oil	10 drops (about 0.5 g)

Method

- 1 Measure the jojoba and grapeseed oils into a clean glass bottle.
- 2 Add the patchouli and cedarwood essential oils.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- Patchouli actually improves with a little age — if you have time, let this sit for a week before using for a rounder, less sharp scent.
- This earthy, grounding blend works well for an autumn-scented batch if you're organizing recipes by season.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body.

Clary Sage Lavender Calm Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Sweet almond oil	90 g (3.2 oz)
Sunflower oil	25 g (0.9 oz)
Clary sage essential oil	15 drops (about 0.75 g)
Lavender essential oil	10 drops (about 0.5 g)

Method

- 1 Measure the almond and sunflower oils into a clean glass bottle.
- 2 Add the clary sage and lavender essential oils.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature, away from direct sunlight.

Tips

- This blend leans calming rather than energizing — a good evening or wind-down oil rather than a morning one.
- Clary sage is generally advised against during pregnancy — check with a doctor first if that applies to you.

Before you make this

Essential oils are concentrated. Do a patch test on your inner arm and wait 24 hours before using a new blend on your whole body. Avoid clary sage essential oil during pregnancy unless a doctor has cleared it.

Cucumber Melon Cooling Body Oil

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
Fractionated coconut oil	95 g (3.3 oz)
Grapeseed oil	20 g (0.7 oz)
Vitamin E oil	2 g (about 1/3 tsp), slows rancidity
Skin-safe cucumber-melon fragrance oil	5 g (1 tsp)

Method

- 1 Measure the fractionated coconut oil and grapeseed oil into a clean glass bottle.
- 2 Add the vitamin E oil and the cucumber-melon fragrance oil.
- 3 Cap tightly and shake gently for 15-20 seconds to combine.
- 4 Label with the date made.

Shelf life

6-12 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- This light, fast-absorbing combination layers well under clothes without feeling sticky in warm weather.
- No essential oil here, so this is a good summer option for anyone avoiding sun-sensitizing citrus oils.
