Citrus Mint Body Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	60 g (2.1 oz)
Distilled water	50 g (1.8 oz)
Polysorbate 20 (helps the essential oils mix into the water instead of floating on top)	5 g (1 tsp)
Sweet orange essential oil	30 drops
Peppermint essential oil	10 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the essential oils first, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content in this recipe helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- Mixing the oils into the polysorbate before adding any liquid is what keeps the spray clear instead of cloudy with floating oil droplets.
- Let it sit for 24-48 hours before judging the scent — it mellows and blends as it rests.

Before you make this

This spray contains alcohol: keep it away from open flame, and avoid spraying directly onto broken or irritated skin.

Lavender Chamomile Sleep Mist

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20 (helps the essential oils mix into the water instead of floating on top)	5 g (1 tsp)
Lavender essential oil	25 drops
Roman chamomile essential oil	10 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the lavender and chamomile essential oils first, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- Mixing the oils into the polysorbate before adding any liquid keeps the spray clear instead of cloudy with floating droplets.
- Mist over pajamas or bedding rather than directly on skin close to the eyes.

Before you make this

This spray contains alcohol: keep it away from open flame, and avoid spraying directly onto broken or irritated skin.

Rose Geranium Body Mist

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Geranium essential oil	25 drops
Palmarosa essential oil	10 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the geranium and palmarosa essential oils, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- Palmarosa has a rose-like note that stretches the scent without needing true rose oil, which is far more expensive.
- Let the bottle sit for 24-48 hours before judging the scent — it mellows and blends as it rests.

Before you make this

This spray contains alcohol: keep it away from open flame, and avoid spraying directly onto broken or irritated skin.

Grapefruit Basil Body Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Grapefruit essential oil	25 drops
Basil essential oil	10 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the grapefruit and basil essential oils, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- This bright, green-citrus combination works well as a morning pick-me-up sprayed on arms and chest before heading out.
- Citrus essential oils fade faster than woody or floral ones — if the scent feels weak after a few months, that's normal, not spoilage.

Before you make this

This spray contains alcohol and phototoxic citrus oil: keep it away from open flame, avoid spraying directly onto broken or irritated skin, and avoid direct sun exposure on treated skin for a few hours after use.

Lemon Verbena Refresh Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Lemon verbena essential oil (or lemongrass as a substitute)	20 drops
Lemon essential oil	10 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the lemon verbena and lemon essential oils, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- This is a sharper, greener citrus than orange-based sprays — a good one to offer alongside a sweeter citrus option for variety.
- Store away from a sunny windowsill: light speeds up how fast citrus top notes fade.

Before you make this

This spray contains alcohol and phototoxic citrus oil: keep it away from open flame, avoid spraying directly onto broken or irritated skin, and avoid direct sun exposure on treated skin for a few hours after use.

Eucalyptus Peppermint Chill Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Eucalyptus essential oil	20 drops
Peppermint essential oil	15 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the eucalyptus and peppermint essential oils, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- Mist onto arms, legs or the back of the neck after a workout for a cooling effect — avoid the face and eyes.
- Keep away from pets: eucalyptus and peppermint essential oils are not safe for cats and dogs.

Before you make this

This spray contains alcohol and strong essential oils: keep it away from open flame, avoid spraying directly onto broken or irritated skin, and keep away from the eyes.

Rosemary Spearmint Clarity Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Rosemary essential oil	20 drops
Spearmint essential oil	15 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the rosemary and spearmint essential oils, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- Spearmint reads softer and sweeter than peppermint, which keeps this from feeling as sharp as a straight mint spray.
- A good desk-drawer spray for a midday refresh without a full shower.

Before you make this

This spray contains alcohol: keep it away from open flame, and avoid spraying directly onto broken or irritated skin. Rosemary essential oil is generally advised against during pregnancy or with seizure disorders — check with a doctor if either applies to you.

Cedarwood Sage Body Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Cedarwood essential oil	20 drops
Clary sage essential oil	15 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the cedarwood and clary sage essential oils, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- This woody, herbal combination reads unisex and works well as an autumn seasonal offering.
- Clary sage is generally advised against during pregnancy — check with a doctor first if that applies to you.

Before you make this

This spray contains alcohol: keep it away from open flame, and avoid spraying directly onto broken or irritated skin.

Sandalwood Vanilla Body Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Sandalwood essential oil	20 drops
Skin-safe vanilla fragrance oil	2 g (about 1/3 tsp)

Method

- 1 In a small bowl, mix the polysorbate 20 with the sandalwood essential oil and vanilla fragrance oil, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- This warm, slightly sweet blend works well as an evening or date-night scent layered over an unscented lotion.
- Let the bottle rest for a day or two before judging the balance between sandalwood and vanilla — it settles as it sits.

Before you make this

This spray contains alcohol: keep it away from open flame, and avoid spraying directly onto broken or irritated skin.

Coconut Lime Beach Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Lime essential oil	15 drops
Skin-safe coconut fragrance oil	3 g (about 1/2 tsp)

Method

- 1 In a small bowl, mix the polysorbate 20 with the lime essential oil and coconut fragrance oil, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- Mist over already-applied sunscreen, not instead of it — this spray has no SPF of its own.
- A good one to pack in a carry-on: it's under typical liquid limits in a 4 fl oz travel bottle.

Before you make this

This spray contains alcohol and phototoxic lime oil: keep it away from open flame, avoid spraying directly onto broken or irritated skin, and avoid direct sun exposure on treated skin for a few hours after use.

Pineapple Coconut Cooler Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Skin-safe pineapple-coconut fragrance oil	4 g (about 3/4 tsp)
Sweet orange essential oil	10 drops

Method

- 1 In a small bowl, mix the polysorbate 20 with the pineapple-coconut fragrance oil and orange essential oil, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- This one leans sweet and fruity rather than true citrus — the small amount of orange oil just brightens the fragrance oil's base.
- A fun poolside or summer-party option alongside the more classic citrus sprays.

Before you make this

This spray contains alcohol: keep it away from open flame, and avoid spraying directly onto broken or irritated skin.

Ylang Ylang Jasmine Night Spray

Active time 5 min active, no cook time

Batch size about 4 fl oz (120 ml)

Ingredients

INGREDIENT	AMOUNT
High-proof unflavored vodka or perfumer's alcohol (at least 80 proof / 40% alcohol)	65 g (2.3 oz)
Distilled water	45 g (1.6 oz)
Polysorbate 20	5 g (1 tsp)
Ylang ylang essential oil	20 drops
Jasmine absolute essential oil	8 drops — jasmine is strong and expensive, a little goes a long way

Method

- 1 In a small bowl, mix the polysorbate 20 with the ylang ylang and jasmine essential oils, stirring until fully blended.
- 2 Add the alcohol and stir again.
- 3 Add the distilled water last, stirring gently.
- 4 Pour into a fine-mist spray bottle through a small funnel.
- 5 Shake before each use.

Shelf life

About 6 months at room temperature. The high alcohol content helps keep it fresh, but it still contains water, so don't stretch it past 6 months, and stop using it if the smell changes.

Tips

- This rich floral blend is strong — one or two mists goes further than you'd expect, especially in a warm room.
- A good special-occasion or date-night spray rather than an everyday one, both for intensity and cost of the jasmine.

Before you make this

This spray contains alcohol: keep it away from open flame, and avoid spraying directly onto broken or irritated skin.
