Welcome

Welcome to The Barber Academy: a self-paced course that takes you from zero to advanced, one technique at a time. It is organized in 6 modules, each one a PDF with written lessons and curated video lessons.

> **Safety and licensing**
> Disinfect tools between clients, use single-use blades, wash your hands and learn what to do with an accidental nick. Many places require a barber or cosmetology license to cut hair for pay: check your local licensing requirements. The Certificate of Completion in this course is not a license.

How the course works

1. Read the module introduction.
2. For each technique: read the written lesson, watch one or two of the curated videos, then do the practice drill on a mannequin.
3. Tick the checklist and move on. Do not rush: clean repetition beats speed.
4. When you finish a module, move to the next. Use the bonuses (Perfect Fade Guide, haircut references, beard manual) alongside.

Course map

MODULE	TOPIC	TECHNIQUES	VIDEO LESSONS
Module 1	Barbering Fundamentals	12	36
Module 2	Fades	12	36
Module 3	Cuts & Styles	12	36
Module 4	Color & Bleaching	6	18
Module 5	Equipment Care	4	12
Module 6	Designs & Freestyle	6	18
Total		52	156
