PILATES

BONUS 2 OF 5

# Client Assessment Form

Intake, goals and progress tracking

> *Print these forms and complete them with each client. A thorough first session and a simple record of progress help you teach safely, choose the right exercises and show clients how far they have come.*

# How to Use This Form

1. Print Parts 1 to 3 and complete them with the client in your first meeting, before any movement.
2. Use Part 2 to observe, not to diagnose. Write what you see and what you will focus on.
3. Use Part 4 at the end of every session or weekly: one row per week for 12 weeks.
4. Repeat Part 5 every 4 weeks and compare with the first assessment.
5. Keep completed forms private and stored securely.

> **Consent and scope**
> This form is an educational tool for certified Pilates instructors. It is not a medical assessment and does not diagnose, treat or promise any result. Ask the client to read and sign the statement below before starting.

| CLIENT CONSENT | COMPLETE |
|---|---|
| I understand this assessment is for planning my Pilates sessions and is not medical advice. | _____ |
| I have answered the health questions honestly and will tell my instructor about any change. | _____ |
| I understand I may stop or modify any exercise at any time. | _____ |
| Client signature | _____ |
| Date | _____ |

# Part 1: Client Intake

## Client details

| FIELD | CLIENT RESPONSE |
|---|---|
| Full name | |
| Age | |
| Occupation | |
| Typical daily posture (sitting, standing, driving, lifting) | |
| Main goals for Pilates | |
| Experience with Pilates (never, some, regular; how long; which styles) | |
| Current physical activity (type, days per week) | |
| Sleep and stress level (brief note) | |
| Preferred days and times | |

## Health history

Tick every item that applies and add notes. Ask open questions and listen. Record what the client tells you, nothing more.

CONDITIONS AND HISTORY (TICK IF YES)

☐ Pregnant or postpartum (weeks / months: _____; doctor's clearance: _____)
☐ High or low blood pressure, or heart condition
☐ Surgery in the past 2 years (what and when: _____)
☐ Low back injury or pain
☐ Knee injury or pain
☐ Shoulder injury or pain
☐ Neck injury or pain
☐ Hip injury or pain
☐ Osteoporosis or osteopenia
☐ Diastasis recti (separation of the abdominal muscles)
☐ Dizziness or fainting
☐ Medication that may affect exercise (note only what the client chooses to share: _____)
☐ Other conditions or limitations: _____

| AREA | DETAILS GIVEN BY THE CLIENT | PRECAUTION TO APPLY |
|---|---|---|
| Pregnancy / postpartum | | |
| Blood pressure | | |
| Surgeries | | |
| Low back | | |
| Knee | | |
| Shoulder | | |
| Neck | | |
| Hip | | |
| Osteoporosis | | |
| Diastasis recti | | |
| Dizziness | | |
| Medication | | |

**Refer to a healthcare professional if**

Refer the client to a doctor or physiotherapist, and wait for clearance, if they report: pain that is sharp, constant or getting worse; numbness, tingling or weakness; dizziness, chest pain or shortness of breath at rest; pregnancy or postpartum without clearance; a recent surgery or fracture; osteoporosis with a recent fall or loss of height; or any condition you are unsure about. When in doubt, ask first and keep the session conservative.

# Part 2: Posture and Movement Assessment

Observe the client in a relaxed position. Write what you see in neutral words (for example, 'right shoulder sits higher') and decide where to focus in the first sessions.

| ITEM | OBSERVATION | NOTES | FOCUS FOR THE FIRST SESSIONS |
|---|---|---|---|
| Standing posture (front, side, back) | | | |
| Spine (curves, mobility) | | | |
| Shoulders | | | |
| Pelvis | | | |
| Feet and ankles | | | |
| Breathing pattern | | | |
| Single-leg balance (left / right, seconds) | | | |
| Roll down (smooth, stiff, where it stops) | | | |
| Bridge (articulation, hip and leg effort) | | | |
| Overhead reach (range, ribs, shoulders) | | | |

**Tip**

Keep it short, about 10 to 15 minutes. Choose no more than three priorities for the first month and explain them to the client in plain words.

# Part 3: Goals and Class Preferences

## Three SMART goals

Goals should be Specific, Measurable, Achievable, Relevant and Time-bound. Example: 'Attend two Pilates classes a week for 8 weeks and reach a comfortable 30 second single-leg balance on each side.'

| GOAL | SPECIFIC (WHAT) | MEASURABLE (HOW WE WILL KNOW) | TIME FRAME | REVIEW DATE |
|---|---|---|---|---|
| Goal 1 | | | | |
| Goal 2 | | | | |

| GOAL | SPECIFIC (WHAT) | MEASURABLE (HOW WE WILL KNOW) | TIME FRAME | REVIEW DATE |
|---|---|---|---|---|
| Goal 3 | | | | |

### Class preferences

| PREFERENCE | CLIENT RESPONSE |
|---|---|
| Class format (private, duo, group) | |
| Equipment preference (Mat, Reformer, Chair, props) | |
| Sessions per week | |
| Session length | |
| Music, pace and style | |
| Exercises the client enjoys | |
| Exercises the client avoids or dislikes | |
| Anything else the instructor should know | |

# Part 4: Progress Tracking (12 Weeks)

Complete one row per week. Pain and energy use a 0 to 10 scale (0 = none, 10 = highest). Measurements are optional and only taken with the client's consent. The 'client's own words' column is often the most valuable record.

| WEEK | DATE | KEY EXERCISES | NOTES | PAIN (0-10) | ENERGY (0-10) | OPTIONAL MEASURES | CLIENT'S OWN WORDS |
|---|---|---|---|---|---|---|---|
| 1 | | | | | | | |
| 2 | | | | | | | |
| 3 | | | | | | | |
| 4 | | | | | | | |
| 5 | | | | | | | |
| 6 | | | | | | | |
| 7 | | | | | | | |
| 8 | | | | | | | |
| 9 | | | | | | | |
| 10 | | | | | | | |
| 11 | | | | | | | |

| WEEK | DATE | KEY EXERCISES | NOTES | PAIN (0-10) | ENERGY (0-10) | OPTIONAL MEASURES | CLIENT'S OWN WORDS |
|---|---|---|---|---|---|---|---|
| 12 | | | | | | | |

| OPTIONAL MEASURES | WEEK 1 | WEEK 4 | WEEK 8 | WEEK 12 |
|---|---|---|---|---|
| Single-leg balance, left (sec) | | | | |
| Single-leg balance, right (sec) | | | | |
| Roll down: how far down / how smooth | | | | |
| Overhead reach comfort (0-10) | | | | |
| Plank or hold time (sec) | | | | |
| Other measure chosen by the client | | | | |

# Part 5: Re-assessment Checklist (Every 4 Weeks)

Repeat at weeks 4, 8 and 12. Tick what you completed and write a short note.

**WEEK 4 RE-ASSESSMENT DATE: _____**

☐ Reviewed health history; any changes, new injuries or medication?
☐ Repeated the Part 2 movements and compared with last time
☐ Reviewed each goal: on track, adjusted or achieved
☐ Checked pain and energy trends in Part 4
☐ Asked how the client feels in daily life (in their own words)
☐ Updated the focus for the next 4 weeks: _____
☐ Adjusted class plan, equipment and progressions
☐ Referred to a healthcare professional if needed: _____

**WEEK 8 RE-ASSESSMENT DATE: _____**

☐ Reviewed health history; any changes, new injuries or medication?
☐ Repeated the Part 2 movements and compared with last time
☐ Reviewed each goal: on track, adjusted or achieved
☐ Checked pain and energy trends in Part 4
☐ Asked how the client feels in daily life (in their own words)
☐ Updated the focus for the next 4 weeks: _____
☐ Adjusted class plan, equipment and progressions
☐ Referred to a healthcare professional if needed: _____

WEEK 12 RE-ASSESSMENT DATE: _____

☐ Reviewed health history; any changes, new injuries or medication?

☐ Repeated the Part 2 movements and compared with last time

☐ Reviewed each goal: on track, adjusted or achieved

☐ Checked pain and energy trends in Part 4

☐ Asked how the client feels in daily life (in their own words)

☐ Updated the focus for the next 4 weeks: _____

☐ Adjusted class plan, equipment and progressions

☐ Referred to a healthcare professional if needed: _____

**Next step**

Complete Parts 1 to 3 with your next new client, then book their first four sessions using the 8-12 Week Progressive Program and the Class Planner.
