How to Be a Nature Explorer

Everything you need to know before heading outside

Nature is full of amazing things to discover! Before you go on your scavenger hunts, read these tips to stay safe and have the best adventure possible.

Safety Tips

- **Always go with a grown-up.** Never explore alone — bring a parent, guardian, or trusted adult with you.
- **Look, don't touch.** Some plants and animals can sting, bite, or cause rashes. If you are not sure what something is, observe it from a safe distance.
- **Never eat wild berries or mushrooms.** Even if they look tasty, they could make you very sick. Only eat food you brought from home.
- **Stay on paths and trails.** Going off-trail can damage plants and animal habitats, and you might get lost.
- **Watch where you step.** Look out for holes, roots, slippery rocks, and uneven ground.
- **Wear sunscreen and a hat.** Protect your skin from the sun, even on cloudy days.
- **Check for ticks after your adventure.** Ask a grown-up to help you check your clothes and skin when you get home.
- **Leave nature as you found it.** Don't pick flowers in parks, don't litter, and don't disturb animal homes.

What to Bring

- [ ] This scavenger hunt book and a pencil or pen
- [ ] A small backpack or bag
- [ ] A water bottle
