BONUS 5

Visual Chord Dictionary - 192 chords

Twelve roots, eight types, two positions

How to use this dictionary

Every chord is drawn twice: the **E-form** (the root is on the 6th string) and the **A-form** (the root is on the 5th string). That makes **192 chords**: 12 roots x 8 types x 2 positions.

- **Dark dots** are chord tones, **orange dots** are roots, an **x** above a string means do not play it, and an **o** means play it open.
- A number to the left of the chord box is the fret where the box begins.
- Under each name you see the notes of the chord and its formula (1 = root, b3 = flat third, and so on).
- Strings run from the 6th (low E, left) to the 1st (high E, right).

> **Barre chords**
>
> Most boxes with the root above the 3rd fret are barre chords: lay your index finger across all the strings at that fret and build the shape above it. If a position feels too high, use the other form for the same chord, which is usually lower on the neck.

Chord types and formulas

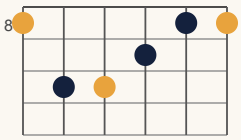

TYPE	SYMBOL	FORMULA	SOUND
Major	C	1 3 5	Bright, stable
Minor	Cm	1 b3 5	Darker, sad
Dominant 7	C7	1 3 5 b7	Bluesy tension
Major 7	Cmaj7	1 3 5 7	Dreamy, soft
Minor 7	Cm7	1 b3 5 b7	Smooth, relaxed
Sus2	Csus2	1 2 5	Open, airy
Sus4	Csus4	1 4 5	Unresolved, wants to move
Diminished	Cdim	1 b3 b5	Tense, unstable

Next step

Pick one chord type and play it in all 12 roots with the E-form, then again with the A-form. Say each chord name and its notes as you play.
