Lavender Baking Soda Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Shea butter	10 g (0.35 oz)
Beeswax pellets	8 g (0.3 oz)
Arrowroot powder (or cornstarch)	15 g (0.5 oz)
Baking soda	10 g (0.35 oz) — see the note below if your skin is sensitive
Lavender essential oil	15 drops

Method

- 1 Melt the coconut oil, shea butter and beeswax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the lavender essential oil.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- This recipe uses less baking soda than many older DIY recipes, which helps with sensitivity — see the safety note below if you still react.
- In hot weather, add an extra 2-3 g of beeswax so it stays solid.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better.

Citrus Sage Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Shea butter	10 g (0.35 oz)
Beeswax pellets	8 g (0.3 oz)
Arrowroot powder (or cornstarch)	15 g (0.5 oz)
Baking soda	10 g (0.35 oz) — see the note below if your skin is sensitive
Sweet orange essential oil	10 drops
Clary sage essential oil	5 drops

Method

- 1 Melt the coconut oil, shea butter and beeswax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the orange and clary sage essential oils.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- This bright, herbal-citrus blend layers well under a fragrance-free routine without clashing with perfume.
- In hot weather, add an extra 2-3 g of beeswax so it stays solid.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better.

Tea Tree Eucalyptus Vegan Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Cocoa butter	10 g (0.35 oz)
Candelilla wax (vegan substitute for beeswax)	6 g (0.2 oz)
Arrowroot powder	15 g (0.5 oz)
Baking soda	9 g (0.3 oz) — see the note below if your skin is sensitive
Tea tree essential oil	10 drops
Eucalyptus essential oil	8 drops

Method

- 1 Melt the coconut oil, cocoa butter and candelilla wax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the tea tree and eucalyptus essential oils.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Candelilla wax is firmer than beeswax at the same weight — if the bar feels too soft in a hot room, add 1-2 g more next batch.
- This fresh, clean scent is a good choice for an active, high-sweat day.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better. Tea tree oil can also irritate on its own — patch test the blend.

Vanilla Cedarwood Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Mango butter	10 g (0.35 oz)
Beeswax pellets	8 g (0.3 oz)
Arrowroot powder	15 g (0.5 oz)
Baking soda	10 g (0.35 oz) — see the note below if your skin is sensitive
Cedarwood essential oil	10 drops
Vanilla fragrance oil	0.5 g (about 10 drops)

Method

- 1 Melt the coconut oil, mango butter and beeswax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the cedarwood essential oil and vanilla fragrance oil.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Mango butter is a bit softer than shea at room temperature — this bar glides on easily, even straight from a cool bathroom.
- This warm, woody-sweet scent works well as a unisex option.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better.

Rosemary Mint Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Shea butter	10 g (0.35 oz)
Beeswax pellets	8 g (0.3 oz)
Cornstarch	15 g (0.5 oz)
Baking soda	10 g (0.35 oz) — see the note below if your skin is sensitive
Rosemary essential oil	10 drops
Peppermint essential oil	8 drops

Method

- 1 Melt the coconut oil, shea butter and beeswax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the cornstarch and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the rosemary and peppermint essential oils.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Cornstarch works as well as arrowroot here and is usually already in the pantry.
- The peppermint gives a noticeable cooling tingle when applied — that's normal and fades within a minute or two.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better.

Sandalwood Patchouli Vegan Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Cocoa butter	10 g (0.35 oz)
Candelilla wax (vegan substitute for beeswax)	6 g (0.2 oz)
Arrowroot powder	15 g (0.5 oz)
Baking soda	9 g (0.3 oz) — see the note below if your skin is sensitive
Sandalwood essential oil	8 drops
Patchouli essential oil	5 drops

Method

- 1 Melt the coconut oil, cocoa butter and candelilla wax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the sandalwood and patchouli essential oils.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Patchouli is strong — start with the stated amount and only add more next batch if you want a deeper scent.
- This is a good gift option for anyone who prefers plant-based waxes over beeswax.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better.

Grapefruit Ginger Energizing Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Shea butter	10 g (0.35 oz)
Beeswax pellets	8 g (0.3 oz)
Arrowroot powder	15 g (0.5 oz)
Baking soda	10 g (0.35 oz) — see the note below if your skin is sensitive
Steam-distilled grapefruit essential oil (not cold-pressed, which is phototoxic)	10 drops
Ginger essential oil	5 drops

Method

- 1 Melt the coconut oil, shea butter and beeswax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the grapefruit and ginger essential oils.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Use steam-distilled grapefruit, not cold-pressed — since this product stays on the skin, a phototoxic oil here is a bigger concern than in a rinse-off scrub.
- This bright, spicy-citrus combo is a nice morning scent to pair with a workout routine.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better.

Gentle Chamomile Oat Sensitive-Skin Deodorant

Active time	10 min active, no cook time
Batch size	about 2.6 oz (75 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Shea butter	10 g (0.35 oz)
Beeswax pellets	8 g (0.3 oz)
Arrowroot powder	20 g (0.7 oz)
Finely ground colloidal oatmeal	5 g (about 1 tsp)
Baking soda	6 g (0.2 oz) — already a lower, gentler amount than a standard recipe
Roman chamomile essential oil	8 drops

Method

- 1 Melt the coconut oil, shea butter and beeswax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder, colloidal oatmeal and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the chamomile essential oil.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.

6

Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- This recipe already uses less baking soda and more soothing powder than a standard batch — it's the one to reach for first if underarm skin tends to react.
- Grind the oatmeal fine; whole oats feel gritty rather than soothing in a deodorant.

Before you make this

Even at this lower amount, baking soda can still irritate very reactive skin (redness, itching, a rash). Patch test on your arm for a few days first. If you still react, replace the baking soda entirely with the same amount of magnesium hydroxide powder, which most people tolerate better. Chamomile is related to ragweed — skip it if you have a ragweed allergy.

Activated Charcoal Detox Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Cocoa butter	10 g (0.35 oz)
Beeswax pellets	8 g (0.3 oz)
Arrowroot powder	15 g (0.5 oz)
Activated charcoal powder (cosmetic grade)	2 g (about 1/2 tsp)
Baking soda	10 g (0.35 oz) — see the note below if your skin is sensitive
Tea tree essential oil	10 drops

Method

- 1 Melt the coconut oil, cocoa butter and beeswax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder, activated charcoal and baking soda until no lumps or dark streaks remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the tea tree essential oil.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- The charcoal tints this deodorant a light gray — let it dry fully before dressing so it doesn't transfer to light-colored clothing.
- Keep the charcoal amount small; this is a cosmetic ingredient here for feel and color, not a medical treatment.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better.

Spiced Orange Holiday Deodorant

Active time	10 min active, no cook time
Batch size	about 2.5 oz (70 g), one standard deodorant tube

Ingredients

INGREDIENT	AMOUNT
Coconut oil	25 g (0.9 oz)
Mango butter	10 g (0.35 oz)
Beeswax pellets	8 g (0.3 oz)
Arrowroot powder	15 g (0.5 oz)
Baking soda	10 g (0.35 oz) — see the note below if your skin is sensitive
Sweet orange essential oil	12 drops
Clove bud essential oil (a strong, 'hot' oil — do not exceed this amount)	3 drops

Method

- 1 Melt the coconut oil, mango butter and beeswax together in a double boiler until fully liquid.
- 2 Remove from heat and whisk in the arrowroot powder and baking soda until no lumps remain.
- 3 Let the mixture cool for 2-3 min, stirring once or twice so the powders don't settle to the bottom.
- 4 Stir in the sweet orange essential oil, then the clove bud essential oil.
- 5 Pour into an empty deodorant tube or a small jar before it sets — it firms up fast.
- 6 Let it cool fully at room temperature (1-2 hours) before using.

Shelf life

Up to 6 months at room temperature. No water in this recipe, so no preservative is needed.

Tips

- Clove bud oil is a warming, high-irritation-potential oil even in small amounts — never increase it past 3 drops in this batch size.
- This spiced scent is a fun seasonal gift set alongside a holiday body butter or scrub.

Before you make this

Baking soda is alkaline and irritates some people's underarm skin (redness, itching, a rash). Patch test on your arm for a few days first. If you react, cut the baking soda to 5 g, or replace it entirely with the same amount of magnesium hydroxide powder, which most people tolerate better. Clove bud oil can also irritate on its own at higher amounts — stick to the stated small dose and patch test the finished blend.
