Citrus Foaming Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Fine sea salt	150 g (5.3 oz)
Fractionated coconut oil	40 g (1.4 oz)
Polysorbate 80 (an emulsifier that lets the oil rinse off instead of clogging the shower)	15 g (0.5 oz)
Sweet orange essential oil	20-25 drops

Method

- 1 In a bowl, stir the fractionated coconut oil and polysorbate 80 together until fully blended.
- 2 Add the sweet orange essential oil and stir again.
- 3 Pour this mixture over the sea salt and fold together with a spatula until every grain is coated.
- 4 Spoon into a wide-mouth jar, pressing down gently so there are no big air pockets.

Shelf life

6 months at room temperature. This version has no water in the jar — it only foams when it meets water in the shower — so it doesn't need a preservative. Keep the lid on tight so moisture from the shower doesn't get in between uses.

Tips

- The polysorbate 80 is what makes this 'foaming' — skip it and you'll get a regular oily salt scrub that can make the tub slippery.
- Use a wide-mouth jar: this scrub is thick and hard to get out of a narrow one.

Before you make this

Salt scrubs can make a wet shower floor slippery — use a mat and rinse the tub after.

Coconut Vanilla Fine Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Fine sea salt	150 g (5.3 oz)
Fractionated coconut oil	40 g (1.4 oz)
Polysorbate 80 (an emulsifier that lets the oil rinse off instead of clogging the shower)	15 g (0.5 oz)
Coconut fragrance oil	2 g (about 1/3 tsp)
Vanilla fragrance oil	1 g (about 1/4 tsp)

Method

- 1 In a bowl, stir the fractionated coconut oil and polysorbate 80 together until fully blended.
- 2 Add the coconut and vanilla fragrance oils and stir again.
- 3 Pour the mixture over the fine sea salt and fold together until every grain is coated.
- 4 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub — it only foams when it meets water in the shower — so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- Fine salt dissolves a little faster under running water than coarse salt — good for a quicker, lighter exfoliation.
- The polysorbate 80 is what makes this scrub foam instead of just sitting oily on the skin.

Eucalyptus Spa Coarse Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Coarse sea salt	150 g (5.3 oz)
Sweet almond oil	40 g (1.4 oz)
Polysorbate 80	15 g (0.5 oz)
Eucalyptus essential oil	20 drops

Method

- 1 In a bowl, stir the sweet almond oil and polysorbate 80 together until fully blended.
- 2 Add the eucalyptus essential oil and stir again.
- 3 Pour the mixture over the coarse sea salt and fold together until every grain is coated.
- 4 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub, so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- Coarse salt is a strong, spa-style exfoliant — best for feet, elbows and knees rather than thinner, more sensitive skin.
- Massage in slow circles; coarse crystals need less pressure than you'd think to do their job.

Before you make this

Coarse salt is more abrasive than fine salt — avoid using it on the face or on freshly shaved or broken skin, and use a lighter hand on thinner areas.

Pink Himalayan Rose Fine Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Fine pink Himalayan salt	150 g (5.3 oz)
Jojoba oil	40 g (1.4 oz)
Polysorbate 80	15 g (0.5 oz)
Rose fragrance oil	3 g (about 1/2 tsp)

Method

- 1 In a bowl, stir the jojoba oil and polysorbate 80 together until fully blended.
- 2 Add the rose fragrance oil and stir again.
- 3 Pour the mixture over the pink Himalayan salt and fold together until every grain is coated.
- 4 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub, so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- Fine pink Himalayan salt gives a softer scrub than coarse sea salt, with a pretty blush color that's nice for gifting.
- Jojoba oil closely resembles skin's natural oils, so this scrub leaves less of a greasy film than heavier oils.

Citrus Grove Coarse Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Coarse sea salt	150 g (5.3 oz)
Grapeseed oil	40 g (1.4 oz)
Polysorbate 80	15 g (0.5 oz)
Sweet orange essential oil	20 drops
Cold-pressed lemon essential oil	10 drops

Method

- 1 In a bowl, stir the grapeseed oil and polysorbate 80 together until fully blended.
- 2 Add the orange and lemon essential oils and stir again.
- 3 Pour the mixture over the coarse sea salt and fold together until every grain is coated.
- 4 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub, so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- Rinse this scrub off fully rather than leaving residual oil on the skin, since the citrus oils in it are meant to be a rinse-off exposure, not a leave-on one.
- Swap the lemon for steam-distilled lime or lemon if you plan to be in direct sun right after showering.

Before you make this

Cold-pressed citrus oils can increase skin's sensitivity to sunburn. Rinse well, and avoid direct sun on treated skin for about 12 hours after use.

Chocolate Mint Fine Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Fine sea salt	140 g (4.9 oz)
Coconut oil, melted	40 g (1.4 oz)
Polysorbate 80	15 g (0.5 oz)
Unsweetened cocoa powder	10 g (0.35 oz)
Peppermint essential oil	15 drops

Method

- 1 Melt the coconut oil gently if it's solid, then stir in the polysorbate 80 until fully blended.
- 2 Whisk in the cocoa powder until the color is even and there are no dry clumps.
- 3 Add the peppermint essential oil and stir again.
- 4 Pour the mixture over the fine sea salt and fold together until every grain is coated.
- 5 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub, so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- Cocoa powder can tint a light-colored tub — rinse the tub after use, the same as you would for a bath bomb.
- If the coconut oil solidifies before you mix in the salt, warm the bowl briefly over hot water to loosen it back up.

Himalayan Pink Salt Lavender Coarse Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Coarse pink Himalayan salt	150 g (5.3 oz)
Sweet almond oil	40 g (1.4 oz)
Polysorbate 80	15 g (0.5 oz)
Lavender essential oil	20 drops

Method

- 1 In a bowl, stir the sweet almond oil and polysorbate 80 together until fully blended.
- 2 Add the lavender essential oil and stir again.
- 3 Pour the mixture over the coarse pink Himalayan salt and fold together until every grain is coated.
- 4 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub, so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- The coarse crystals here are bigger than table salt — use on feet, elbows and knees, not on the face.
- This blend works well as an evening, wind-down scrub right before a shower.

Detox Charcoal Sea Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Coarse sea salt	145 g (5.1 oz)
Olive oil	40 g (1.4 oz)
Polysorbate 80	15 g (0.5 oz)
Activated charcoal powder (cosmetic grade)	5 g (about 1 tsp)
Tea tree essential oil	15 drops

Method

- 1 In a bowl, stir the olive oil and polysorbate 80 together until fully blended.
- 2 Whisk in the activated charcoal until the color is even with no dark streaks.
- 3 Add the tea tree essential oil and stir again.
- 4 Pour the mixture over the coarse sea salt and fold together until every grain is coated.
- 5 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub, so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- Use a dark towel the first few times — charcoal can temporarily tint light fabric and tub surfaces.

- This is a good back-and-shoulders scrub for oily or congested skin, not an everyday full-body one.

Before you make this

Tea tree oil can irritate sensitive skin — patch test on your inner arm before using it over a large area for the first time.

Tropical Pineapple Coconut Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Fine sea salt	150 g (5.3 oz)
Fractionated coconut oil	40 g (1.4 oz)
Polysorbate 80	15 g (0.5 oz)
Pineapple coconut fragrance oil (skin-safe cosmetic fragrance)	3 g (about 1/2 tsp)

Method

- 1 In a bowl, stir the fractionated coconut oil and polysorbate 80 together until fully blended.
- 2 Add the pineapple coconut fragrance oil and stir again.
- 3 Pour the mixture over the fine sea salt and fold together until every grain is coated.
- 4 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub, so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- This is a fun summer or vacation-themed batch — pack it in a small travel jar for the beach bag.
- If the scent is too strong straight out of the bottle, cut the fragrance oil to 2 g and test again.

Unscented Sensitive Skin Salt Scrub

Active time 10 min active, no cook time

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Fine sea salt	150 g (5.3 oz)
Sunflower oil	40 g (1.4 oz)
Polysorbate 80	15 g (0.5 oz)

Method

- 1 In a bowl, stir the sunflower oil and polysorbate 80 together until fully blended.
- 2 Pour the mixture over the fine sea salt and fold together until every grain is coated.
- 3 Spoon into a wide-mouth jar, pressing down gently to remove large air pockets.

Shelf life

6 months at room temperature. No water is added to this scrub, so it doesn't need a preservative. Keep the lid on tight between uses.

Tips

- Fragrance-free is a good choice for reactive or very sensitive skin, or for anyone who prefers unscented products.
- If you'd like a light scent later, stir in 10-15 drops of a gentle essential oil per batch and test on a small area first.
