Honey Oat Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk or glycerin)	200 g (7 oz)
Liquid foaming bath base (to get the fluffy, whipped texture)	40 g (1.4 oz)
Raw honey	10 g (2 tsp)
Finely ground oats	10 g (2 tbsp)
Fragrance or essential oil	2 g (about 1/2 tsp)

Method

- 1 Cut the soap base into small cubes and melt in a double boiler or microwave in 20-second bursts, stirring between each, until fully liquid.
- 2 Let it cool for 2-3 min, just until it starts to thicken slightly at the edges.
- 3 Whip with a hand mixer on high for 3-5 min, until it turns light, opaque and fluffy.
- 4 Add the foaming bath base and whip for another 1-2 min to combine.
- 5 Fold in the honey, ground oats and fragrance with a spatula (don't whip these in, or you'll knock out the air).
- 6 Spoon into jars right away — it firms up fast once it stops being whipped.
- 7 Leave uncovered overnight to fully set, then cap.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This is a melt-and-pour recipe: it never involves raw lye, so it's safe to make without the gear or ventilation that from-scratch soap making needs.
- If it deflates instead of staying fluffy, the base cooled too much before whipping — work faster next time, or rewarm it for a few seconds.

Lavender Fields Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	180 g (6.3 oz)
Liquid foaming bath base	30 g (1 oz)
Dried lavender buds, lightly crushed	8 g (1 tbsp)
Lavender essential oil	4 g (about 35-40 drops)

Method

- 1 Cut the glycerin soap base into small cubes and melt in a double boiler or microwave in 20-second bursts, stirring between, until fully liquid.
- 2 Let it cool 2-3 min, just until it starts to thicken slightly at the edges.
- 3 Whip with a hand mixer on high for 3-5 min, until light, opaque and fluffy.
- 4 Add the foaming bath base and whip 1-2 min more to combine.
- 5 Fold in half the lavender buds and all the essential oil with a spatula (don't whip — you'd knock the air back out).
- 6 Spoon into jars right away and scatter the remaining lavender buds on top.
- 7 Leave uncovered overnight to fully set, then cap.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This is a melt-and-pour recipe — it never touches raw lye, so none of the ventilation or protective gear that from-scratch soap making needs applies here.
- If it deflates instead of staying fluffy, the base cooled too much before you started whipping — work a little faster next time.

Citrus Sunrise Swirl Soap

Active time 30 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	210 g (7.4 oz)
Liquid foaming bath base	40 g (1.4 oz)
Sweet orange essential oil	3 g (about 30 drops)
Grapefruit essential oil	2 g (about 20 drops)
Orange cosmetic mica	1 g (1/8 tsp)
Yellow cosmetic mica	1 g (1/8 tsp)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two separate heatproof bowls, split roughly evenly.
- 3 Stir the orange mica into the first bowl and the yellow mica into the second, until each is evenly colored.
- 4 Let both bowls cool 2-3 min until they start to thicken at the edges.
- 5 Whip each bowl separately on high for 3-4 min until fluffy, then whip half the foaming bath base into each.
- 6 Fold the orange essential oil into the orange bowl and the grapefruit essential oil into the yellow bowl.

7 Spoon alternating dollops of each color into a jar, then run a skewer through once or twice to swirl — stop before the colors blend into one shade.

8 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- One pass with the skewer gives bold ribbons; more passes blur the swirl toward a single muddy color — less is more.
- Work on both colors at close to the same pace so neither one sets up stiffer than the other before you swirl them together.

Toasted Coconut Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	185 g (6.5 oz)
Liquid foaming bath base	30 g (1 oz)
Finely shredded unsweetened coconut	7 g (1 tbsp)
Coconut fragrance oil	3 g (about 1/2 tsp)

Method

- 1 Cut the goat's milk soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until pale, opaque and fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the shredded coconut and fragrance oil by hand with a spatula.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Toast the shredded coconut in a dry pan for 1-2 min before using it if you want flecks of golden color and a deeper aroma — let it cool fully before folding it in.

- Goat's milk soap bases can scorch faster than clear glycerin — keep the heat low and stir often.

Gentle Oat & Chamomile Baby Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (fragrance-free, hypoallergenic)	190 g (6.7 oz)
Liquid foaming bath base (fragrance-free)	30 g (1 oz)
Colloidal (finely ground) oatmeal	8 g (2 tsp)
Dried chamomile flowers, crushed	5 g (1 tsp)

Method

- 1 Cut the fragrance-free soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until light and fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the colloidal oatmeal and crushed chamomile flowers by hand — no fragrance oil in this one, so it stays gentle for sensitive or young skin.
- 6 Spoon into small jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This version skips fragrance oil on purpose — unscented is the safest starting point for a child's skin; add it later only if the family tolerates fragrance well.
- Keep the chamomile pieces small so they don't feel scratchy on delicate skin.

Morning Espresso Scrub Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	180 g (6.3 oz)
Liquid foaming bath base	30 g (1 oz)
Finely ground coffee	10 g (1 tbsp)
Vanilla fragrance oil	3 g (about 1/2 tsp)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy and pale.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the ground coffee and vanilla fragrance oil by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Use a fine or medium coffee grind, not whole beans or a coarse grind — coarse grounds can feel scratchy rather than gently exfoliating.

- Coffee grounds settle if the base is too thin when you fold them in — wait until the whipped soap holds stiff peaks first.

Rose Garden Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (shea butter)	185 g (6.5 oz)
Liquid foaming bath base	28 g (1 oz)
Dried rose petals, crushed	8 g (2 tbsp)
Rose geranium essential oil	4 g (about 35 drops)

Method

- 1 Cut the shea butter soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in half the rose petals and all the essential oil.
- 6 Spoon into jars and scatter the rest of the rose petals on top for a finished look.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- True rose essential oil is very expensive — rose geranium gives a similar floral note at a fraction of the cost and works well here.
- Shea butter soap base can smell faintly nutty on its own; a slightly stronger fragrance dose than usual helps it come through.

Eucalyptus Spa Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	182 g (6.4 oz)
Liquid foaming bath base	30 g (1 oz)
Dried eucalyptus or mint leaf bits	6 g (1 tbsp)
Eucalyptus essential oil	2.5 g (about 25 drops)
Peppermint essential oil	1.5 g (about 15 drops)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy and glossy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the dried leaf bits and both essential oils by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This combination works well next to the shower where steam can lift the aroma — a little goes a long way.
- Crush the dried leaves between your fingers before adding them so they distribute evenly instead of clumping.

Vanilla Bean Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (cocoa butter)	186 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Ground vanilla bean pod (vanilla bean specks)	3 g (1/2 tsp)
Vanilla fragrance oil	4 g (about 1/2 tsp + a little)

Method

- 1 Cut the cocoa butter soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until pale and fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the vanilla bean specks and fragrance oil by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Real vanilla bean specks can darken slightly over weeks in a light-colored soap — that's cosmetic, not a sign of spoilage.

- Cocoa butter soap base has a natural chocolate-cream scent that pairs beautifully under vanilla without fighting it.

Pumpkin Spice Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	185 g (6.5 oz)
Liquid foaming bath base	28 g (1 oz)
Ground cinnamon	2 g (1/2 tsp)
Ground ginger	1 g (1/4 tsp)
Ground nutmeg	1 g (1/4 tsp)
Orange cosmetic mica (color only, no pumpkin puree used)	1 g (1/8 tsp)
Pumpkin-spice-type fragrance oil	4 g (about 1/2 tsp)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the spices, mica and fragrance oil by hand, until the color is even.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This recipe uses spices and fragrance for a pumpkin-spice feel only — no actual pumpkin or food ingredient goes in, which keeps it stable and mold-free.
- Ground spices can feel gritty in larger amounts — the quantities here are for scent and flecks of color, not exfoliation.

Charcoal Detox Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (white glycerin)	185 g (6.5 oz)
Liquid foaming bath base	28 g (1 oz)
Activated charcoal powder	2 g (1/2 tsp)
Kaolin clay	5 g (1 tsp)
Tea tree essential oil	2 g (about 20 drops)
Peppermint essential oil	1 g (about 10 drops)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the activated charcoal and kaolin clay a little at a time until the gray color is even — charcoal is potent and goes further than it looks.
- 6 Fold in both essential oils.
- 7 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Add charcoal gradually — it's easy to oversaturate the color, and it can stain light-colored towels if used in excess.
- Wipe your work surface right after you're done; charcoal powder tracks easily while it's still dry.

Calendula Clay Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (aloe vera)	185 g (6.5 oz)
Liquid foaming bath base	28 g (1 oz)
Dried calendula petals	5 g (1 tbsp)
French green clay	5 g (1 tsp)
Lavender essential oil (optional, light amount)	2 g (about 20 drops)

Method

- 1 Cut the aloe vera soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the calendula petals and french green clay until evenly colored pale green.
- 6 Fold in the lavender essential oil if using, or leave unscented for the most sensitive skin.
- 7 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Calendula is one of the gentlest dried flowers to use on reactive skin — this combination is a good one to offer fragrance-free.
- French green clay can feel drying in high amounts; this recipe keeps it light, mainly for color and a soft mineral feel.

Lemon Poppy Seed Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	187 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Poppy seeds	6 g (1 tbsp)
Lemon essential oil	4 g (about 40 drops)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy and glossy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the poppy seeds and lemon essential oil by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Poppy seeds stay put nicely in clear glycerin bases because the whipped texture thickens fast — fold them in as soon as the soap holds peaks.

- Citrus essential oils fade faster than floral ones — use this one within its shelf life for the brightest scent.

Loofah Scrub Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (white glycerin)	188 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Dried loofah, cut into small pieces	7 g (2 tbsp)
Rosemary essential oil (optional)	2 g (about 20 drops)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the chopped loofah pieces and rosemary essential oil, if using.
- 6 Spoon into jars, pressing lightly so the loofah pieces stay distributed instead of sinking.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Cut the loofah pieces small (pea-sized or smaller) — large chunks feel rough rather than gently exfoliating.
- This one is nice left unscented too, since the loofah itself does the work; the rosemary oil is optional.

Hot Cocoa Whipped Soap

Active time 35 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (cocoa butter)	220 g (7.8 oz)
Liquid foaming bath base	40 g (1.4 oz)
Cocoa powder (bottom layer only)	8 g (1 tbsp)
Vanilla fragrance oil	4 g (about 1/2 tsp)
Cocoa or chocolate fragrance oil	4 g (about 1/2 tsp)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour about half the liquid base into a second bowl.
- 3 Stir the cocoa powder and cocoa fragrance oil into one bowl; this is the brown 'cocoa' layer.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl.
- 6 Spoon the brown cocoa whip into jars first as the bottom layer and smooth the top; let it firm for 15-20 min until set to the touch.
- 7 Stir the vanilla fragrance oil into the remaining white whipped base, then spoon it on top as the 'marshmallow' layer.

8

Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Letting the bottom layer firm up before adding the top is what keeps the two layers distinct instead of blending into one color.
- If the top layer sinks into the bottom, the first layer wasn't set enough yet — give it a few more minutes next time.

Himalayan Pink Salt Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (shea butter)	187 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Finely ground pink Himalayan salt	7 g (1 tbsp)
Geranium essential oil	3 g (about 30 drops)

Method

- 1 Cut the shea butter soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the finely ground salt and geranium essential oil by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Grind the salt finer than table salt — coarse crystals in a whipped soap can feel sharp rather than smooth.

- Use this one as a light polish, not a heavy-duty scrub; it's meant to be gentle enough for daily use.

Rosemary Mint Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (olive oil, Castile-style)	185 g (6.5 oz)
Liquid foaming bath base	28 g (1 oz)
Dried rosemary, crumbled	5 g (1 tbsp)
Rosemary essential oil	2 g (about 20 drops)
Peppermint essential oil	2 g (about 20 drops)

Method

- 1 Cut the Castile-style soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy — olive oil bases can take slightly longer to turn light than glycerin.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the dried rosemary and both essential oils.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Crumble the rosemary between your fingers so you get soft flecks, not stiff stems that poke through the surface.
- This herbal pairing works well as a unisex bar — a good one to offer alongside the more floral scents.

Earl Grey Bergamot Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	187 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Finely ground black tea leaves (from a tea bag)	4 g (1 tsp)
Bergamot essential oil	4 g (about 40 drops)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy and glossy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the ground tea leaves and bergamot essential oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Use the loose tea from inside a tea bag rather than steeped leaves — dry tea distributes much more evenly than wet.

- Bergamot essential oil can be photosensitizing on skin in sunlight in leave-on products, but since this soap is rinsed off right away that isn't a concern here.

Cucumber Melon Swirl Soap

Active time 30 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (aloe vera)	215 g (7.6 oz)
Liquid foaming bath base	40 g (1.4 oz)
Green cosmetic mica or a pinch of spirulina powder (for the green half)	1 g (1/8 tsp)
Cucumber melon fragrance oil	5 g (about 1 tsp)

Method

- 1 Cut the aloe vera soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the green mica (or spirulina) into one bowl only; leave the other bowl clear white.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold half the fragrance oil into each.
- 6 Spoon alternating dollops of each color into a jar and swirl once with a skewer.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Spirulina gives a softer, more natural green than mica, but use it sparingly — a little tints a lot.
- This fragrance is a crowd-pleaser for summer gift sets; pair it with the Citrus Sunrise Swirl Soap for a matching set.

Gingerbread Whipped Soap

Active time 35 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	216 g (7.6 oz)
Liquid foaming bath base	40 g (1.4 oz)
Ground cinnamon, clove and ginger blend (bottom layer only)	4 g (1 tsp)
Cocoa powder, for color (bottom layer only)	4 g (1 tsp)
Gingerbread-type fragrance oil (or a cinnamon/clove/ginger essential oil blend)	6 g (about 1.25 tsp)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the spice blend and cocoa powder into one bowl only, for the brown 'gingerbread' layer.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold half the fragrance into each.
- 6 Spoon the brown layer into jars first, smooth the top, and let it firm for 15-20 min until set to the touch.
- 7 Spoon the plain white layer on top.
- 8 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Let the spiced bottom layer firm fully before adding the white top — this keeps the two-tone look crisp.
- Ground spices can darken over time in a light base; that's cosmetic and expected, not a sign the soap has gone bad.

Jasmine Petal Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	182 g (6.4 oz)
Liquid foaming bath base	28 g (1 oz)
Sweet almond oil (adds a touch of silkiness)	5 g (1 tsp)
Dried jasmine tea flowers, crushed	5 g (1 tbsp)
Jasmine fragrance oil	5 g (about 1 tsp)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Whip in the sweet almond oil for the last 30 seconds.
- 6 Fold in the crushed jasmine flowers and fragrance oil by hand.
- 7 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Dried jasmine tea flowers (sold for brewing tea) are an easy, food-grade-adjacent source of real jasmine petals for crafting.
- A small amount of almond oil whipped in gives the lather a slightly silkier feel without making the bar too soft to hold its shape.

Honeysuckle Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (shea butter)	187 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Dried calendula petals (for a soft yellow fleck)	4 g (1 tsp)
Honeysuckle-type fragrance oil	6 g (about 1.25 tsp)

Method

- 1 Cut the shea butter soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the calendula petals and fragrance oil by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- True honeysuckle essential oil isn't commercially extracted — a skin-safe fragrance oil is the standard, reliable way to get this scent.

- This one is a nice everyday spring scent that isn't as heavy as rose or jasmine.

Lavender Clay Marbled Soap

Active time 30 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (white glycerin)	212 g (7.5 oz)
Liquid foaming bath base	40 g (1.4 oz)
Rhassoul clay (for the purple-gray half)	5 g (1 tsp)
Purple cosmetic mica (for the purple-gray half)	1 g (1/8 tsp)
Dried lavender buds	6 g (1 tbsp)
Lavender essential oil	6 g (about 55 drops)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the rhassoul clay and purple mica into one bowl only, until it turns an even lavender-gray.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold half the lavender buds and essential oil into each.
- 6 Spoon small, random dollops of each color into a jar, alternating as you go, then drag a skewer through in a few loose figure-eight motions for a soft, feathered marble (don't aim for neat stripes).

7

Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- A marbled look uses more, lighter skewer passes than a bold swirl — the goal is a soft blend at the edges, not sharp ribbons.
- Rhassoul clay can thicken the mixture slightly faster than plain soap — whip that bowl just a touch less than the plain one so both are ready to spoon at the same time.

Matcha Green Tea Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (white glycerin)	188 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Matcha (green tea) powder	4 g (1 tsp)
Light green tea or herbal-type fragrance oil	5 g (about 1 tsp)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the matcha powder a little at a time until the green color is even, then fold in the fragrance oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Sift the matcha before adding it if it's clumpy — this keeps the green from streaking unevenly through the soap.
- Matcha's color mellows to a softer sage tone after a few weeks; that fading is normal and not a quality issue.

Golden Turmeric Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (honey)	190 g (6.7 oz)
Liquid foaming bath base	28 g (1 oz)
Ground turmeric	1.5 g (1/4 tsp) — a little goes a long way
Honey-and-spice-type fragrance oil	5.5 g (about 1 tsp)

Method

- 1 Cut the honey soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the turmeric a pinch at a time, checking the color as you go, then fold in the fragrance oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Turmeric stains light-colored washcloths and bathtubs — use a dark washcloth or rinse the tub right after use.

- Start with less turmeric than you think you need; you can always fold in a bit more, but you can't take it back out.

Champagne Rose Swirl Soap

Active time 30 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	216 g (7.6 oz)
Liquid foaming bath base	40 g (1.4 oz)
Cosmetic shimmer mica, champagne or pink gold	1.5 g (1/4 tsp)
Dried rose petals, crushed	5 g (1 tbsp)
Rose fragrance oil	5.5 g (about 1 tsp)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the shimmer mica into one bowl only, for the pale pink-gold half; leave the other clear white.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold half the rose petals and fragrance oil into each.
- 6 Spoon alternating dollops of each color into a jar and swirl once with a skewer.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Cosmetic-grade mica only — regular craft or art glitter is not made for skin contact and should never go in a soap recipe.
- This one makes an elegant wedding favor; pour into small 2 oz (56 g) jars instead of one large one if you're gifting individually.

Spearmint Confetti Soap

Active time 25 min active (plus time to prep confetti ahead), plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	190 g (6.7 oz)
Liquid foaming bath base	28 g (1 oz)
Soap confetti (small cut pieces of leftover colored melt-and-pour soap, cooled and firm)	12 g (about 2 tbsp)
Spearmint essential oil	3 g (about 30 drops)

Method

- 1 If you don't already have soap confetti on hand, melt and pour a small amount of colored scrap soap into a thin layer, let it set fully, then dice it into small cubes.
- 2 Cut the main soap base into cubes and melt in a double boiler until fully liquid.
- 3 Let it cool 2-3 min until it starts to thicken at the edges.
- 4 Whip on high for 3-5 min until fluffy.
- 5 Add the foaming bath base and whip 1-2 min more.
- 6 Fold in the spearmint essential oil, then gently fold in the soap confetti pieces last, just until distributed.
- 7 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This is a great way to use up small leftover pieces from other batches instead of throwing them away.
- Fold the confetti in last and gently — over-mixing will start to melt the small pieces into the whipped base and blur the color pop.

Cranberry Orange Holiday Soap

Active time 35 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (white glycerin)	216 g (7.6 oz)
Liquid foaming bath base	40 g (1.4 oz)
Dried cranberries, finely chopped (bottom layer only)	6 g (1 tbsp)
Dried orange zest powder	3 g (1 tsp)
Red cosmetic mica (bottom layer only)	1 g (1/8 tsp)
Sweet orange essential oil	5 g (about 50 drops)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the chopped cranberries and red mica into one bowl only, for the red bottom layer.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold the orange zest and half the orange essential oil into each.
- 6 Spoon the red cranberry layer into jars first, smooth the top, and let it firm for 15-20 min until set to the touch.

7 Spoon the plain white layer on top.

8 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Chop the dried cranberries small and make sure they're fully dehydrated (not the chewy, moist kind) so they don't introduce extra moisture into the soap.
- This layered red-and-white look makes a nice holiday gift set alongside the Gingerbread Whipped Soap.

Sandalwood Cedarwood Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (shea butter)	190 g (6.7 oz)
Liquid foaming bath base	30 g (1 oz)
Sandalwood fragrance oil	3 g (about 1/2 tsp)
Cedarwood essential oil	2 g (about 20 drops)

Method

- 1 Cut the shea butter soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in both fragrances by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This one has no exfoliant inclusion by design — a smooth whipped bar with a woodsy scent reads as more unisex and gift-ready.

- If you want a deeper color, fold in a pinch of cocoa powder — a little goes a long way in a light base.

Pink Grapefruit Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	187 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Poppy seeds	6 g (1 tbsp)
Pink grapefruit essential oil	4 g (about 40 drops)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy and glossy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the poppy seeds and grapefruit essential oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Grapefruit essential oil fades a little faster than other citrus oils — store this one away from direct sunlight to keep the scent fresh longer.

- Add a tiny drop of pink mica if you want visual color to match the name; it's optional and purely cosmetic.

Lily Blossom Pastel Swirl Soap

Active time 30 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	180 g (6.3 oz)
Liquid foaming bath base	35 g (1.2 oz)
Pink cosmetic mica (for one half)	0.5 g (a small pinch)
Lily-type floral fragrance oil	5 g (about 1 tsp)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the pink mica into one bowl only, for a soft pastel pink; leave the other clear white.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold half the fragrance oil into each.
- 6 Spoon alternating small dollops of each color into a jar and swirl once with a skewer for a soft pastel marble.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Keep the pink very pale — a tiny pinch of mica goes further than you'd expect in a white base.
- This pastel look is popular for baby showers and spring gifts; pair it with a floral or very light fragrance.

Honey Almond Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (honey)	187 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Finely ground almond meal	6 g (1 tbsp)
Almond and vanilla fragrance oil	4 g (about 1/2 tsp)

Method

- 1 Cut the honey soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the ground almond meal and fragrance oil by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Grind the almond meal fine — coarse chunks of nut meal can feel abrasive rather than gently polishing.

- Note for gifting: let recipients with tree nut allergies know this one contains almond meal, even though it's rinsed off rather than eaten.

Chocolate Mint Swirl Soap

Active time 30 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (cocoa butter)	212 g (7.5 oz)
Liquid foaming bath base	40 g (1.4 oz)
Cocoa powder (for the brown half)	6 g (1 tbsp)
Peppermint essential oil	4 g (about 40 drops)
Cocoa or chocolate fragrance oil	4 g (about 1/2 tsp)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the cocoa powder into one bowl only, for the brown half; leave the other bowl white.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold the cocoa fragrance into the brown bowl and the peppermint oil into the white bowl.
- 6 Spoon alternating dollops of each color into a jar and swirl once with a skewer.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Keeping the two fragrances in separate halves until the last fold-in step keeps the chocolate and mint notes distinct instead of muddy.
- This one is popular around the winter holidays — package it with a ribbon in brown and white twine.

Coffee Cardamom Scrub Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	185 g (6.5 oz)
Liquid foaming bath base	28 g (1 oz)
Finely ground coffee	8 g (1 tbsp)
Ground cardamom	1 g (1/4 tsp)
Vanilla fragrance oil (optional, light amount)	3 g (about 1/2 tsp)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the ground coffee, cardamom and vanilla fragrance oil, if using.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Cardamom is a warm, slightly citrusy spice that pairs well with coffee without pushing the scent toward dessert — use it sparingly, it's potent.
- This makes a good fall scrub bar alongside a classic Pumpkin Spice or Gingerbread soap.

Fresh Linen Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (fragrance-free, hypoallergenic)	192 g (6.8 oz)
Liquid foaming bath base (fragrance-free)	28 g (1 oz)
Clean cotton / fresh linen-type cosmetic fragrance oil	5 g (about 1 tsp)

Method

- 1 Cut the fragrance-free soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until light and fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the fragrance oil by hand.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- No inclusions or color in this one on purpose — it's meant as a clean, simple everyday bar for people who find floral or spiced scents overwhelming.

- If a buyer needs it completely scent-free too, simply leave out the fragrance oil; the base itself has almost no smell.

Pine Forest Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (hemp seed oil)	188 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Dried rosemary, crumbled (optional, for texture)	4 g (1 tsp)
Pine or fir needle essential oil	5 g (about 1 tsp)

Method

- 1 Cut the hemp seed oil soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy — hemp seed oil bases often whip to a slightly green-tinted white.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the rosemary, if using, and the pine essential oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This scent is a good seasonal rotation for a winter gift set alongside the Gingerbread and Cranberry Orange soaps.
- Hemp seed oil soap base has a naturally earthy undertone that works with woody and herbal scents better than with light florals.

Strawberry Cream Layered Soap

Active time 35 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (cocoa butter)	216 g (7.6 oz)
Liquid foaming bath base	40 g (1.4 oz)
Pink cosmetic mica (bottom layer only)	1 g (1/8 tsp)
Strawberry fragrance oil	6 g (about 1.25 tsp)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the pink mica into one bowl only, for the pink bottom layer.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold half the fragrance oil into each.
- 6 Spoon the pink layer into jars first, smooth the top, and let it firm for 15-20 min until set to the touch.
- 7 Spoon the white 'cream' layer on top.
- 8 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This dessert-style look sells well as a gift set — a glass jar shows off the two layers clearly.
- If the layers blend at the seam instead of staying crisp, the bottom layer needed more firming time before you added the top.

Kids' Bubblegum Swirl Soap

Active time 30 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (fragrance-free, hypoallergenic)	182 g (6.4 oz)
Liquid foaming bath base (fragrance-free)	35 g (1.2 oz)
Pink cosmetic mica (for one half)	0.5 g (a small pinch)
Blue cosmetic mica (for the other half)	0.5 g (a small pinch)
Bubblegum-type cosmetic fragrance oil, formulated for children's products	4 g (about 1/2 tsp), used at a lower-than-adult rate

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the pink mica into one bowl and the blue mica into the other.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold half the fragrance oil into each.
- 6 Spoon alternating dollops of pink and blue into a jar and swirl once with a skewer.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Use a fragrance oil specifically formulated and rated for children's bath products, at the lower end of its suggested rate — kids' skin is more reactive than adult skin.
- Patch test any new fragrance on a small area first, and skip fragrance entirely for a child with known sensitivities — the plain swirl still looks fun with color alone.

Oatmeal Milk Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	188 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Finely ground oats	6 g (1 tbsp)
Light vanilla fragrance oil	3 g (about 1/2 tsp)

Method

- 1 Cut the goat's milk soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until pale and fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the finely ground oats and vanilla fragrance oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This is a gentler, milder cousin to a dessert-style oat soap — a good everyday bar for anyone with slightly reactive skin who still wants light exfoliation.

- Grind the oats in a coffee or spice grinder until they're a fine powder, not whole flakes, for the softest feel.

Rhubarb Rose Swirl Soap

Active time 30 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	180 g (6.3 oz)
Liquid foaming bath base	35 g (1.2 oz)
Red cosmetic mica (for one half)	0.5 g (a small pinch)
Dried rose petals, crushed	5 g (1 tbsp)
Rhubarb-rose fragrance oil	5 g (about 1 tsp)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the red mica into one bowl only, for a deep rose-red half; leave the other clear white.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold the rose petals and half the fragrance oil into each.
- 6 Spoon alternating dollops of each color into a jar and swirl once with a skewer.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This tart-floral fragrance pairing is a nice change of pace from straight rose — it reads less 'old-fashioned perfume' and more modern.
- Keep the red mica proportion low to start; it's easy to oversaturate a whipped base to a much darker shade than intended.

Autumn Apple Cinnamon Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	184 g (6.5 oz)
Liquid foaming bath base	28 g (1 oz)
Ground cinnamon	2 g (1/2 tsp)
Dehydrated apple bits, finely chopped	4 g (1 tbsp)
Apple cinnamon fragrance oil	7 g (about 1.5 tsp)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the cinnamon, dehydrated apple bits and fragrance oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Use fully dehydrated, crisp-dry apple pieces, not fresh or soft-dried fruit — any trapped moisture doesn't belong in a melt-and-pour soap.
- Chop the apple bits small; large pieces can stick out of the surface and go stale-looking faster than the soap itself ages.

Candy Cane Stripe Whipped Soap

Active time 35 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	220 g (7.8 oz)
Liquid foaming bath base	40 g (1.4 oz)
Red cosmetic mica (for the red stripe layer)	1 g (1/8 tsp)
Peppermint essential oil	6 g (about 55 drops)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the red mica into one bowl only, for the red stripe; leave the other bowl clear white.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold half the peppermint oil into each.
- 6 Spoon a layer of white into the jar, let it firm for 10-15 min, then add a layer of red, then white again, repeating to build thin stripes.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- The name and color here are inspired by the classic candy's look and peppermint scent only — no actual candy or sugar goes into this soap.
- Thin layers that firm between pours give the cleanest stripes; thick layers poured too fast tend to bleed into each other.

Desert Sage Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (olive oil, Castile-style)	188 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Dried sage leaves, crumbled	4 g (1 tsp)
Clary sage essential oil	3 g (about 30 drops)
Lavender essential oil	2 g (about 20 drops)

Method

- 1 Cut the Castile-style soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the sage leaves and both essential oils.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- A touch of lavender softens clary sage's herbal edge without turning the scent floral.
- This earthy, herbal bar works well marketed as a unisex or men's option alongside Rosemary Mint and Pine Forest.

Blackberry Sage Marbled Soap

Active time 30 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	212 g (7.5 oz)
Liquid foaming bath base	40 g (1.4 oz)
Purple cosmetic mica (for the berry half)	1 g (1/8 tsp)
Dried sage leaves, crumbled (for the green half)	3 g (1 tsp)
Blackberry fragrance oil	4 g (about 1/2 tsp)
Clary sage essential oil	3 g (about 30 drops)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the purple mica into one bowl and the crumbled sage into the other.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold the blackberry fragrance into the purple bowl and the clary sage oil into the green-flecked bowl.
- 6 Spoon small, random dollops of each color into a jar, alternating as you go, then drag a skewer through in loose figure-eight motions for a soft marbled look.

7

Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Fruity-herbal combinations like this one are a nice change for fall gift sets alongside more classic spice scents.
- A marbled finish is forgiving for beginners — even an uneven skewer pass still looks intentional, unlike a bold swirl that needs cleaner technique.

Vanilla Chai Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (honey)	184 g (6.5 oz)
Liquid foaming bath base	28 g (1 oz)
Chai spice blend (cinnamon, cardamom, clove, ground black tea)	3 g (3/4 tsp)
Vanilla fragrance oil	7 g (about 1.5 tsp)

Method

- 1 Cut the honey soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the chai spice blend and vanilla fragrance oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Mix your own chai blend from pantry spices in equal small parts, or use a pre-mixed chai spice blend sold for baking — either works fine here since it's for scent and fleck, not consumption.

- This is a cozy option to rotate in for fall and winter alongside Pumpkin Spice and Gingerbread.

Coconut Lime Swirl Soap

Active time 30 min active, plus overnight to firm

Batch size about 10 oz (280 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	212 g (7.5 oz)
Liquid foaming bath base	40 g (1.4 oz)
Green cosmetic mica (for one half)	0.5 g (a small pinch)
Dried lime zest powder	3 g (1 tsp)
Coconut fragrance oil	4 g (about 1/2 tsp)
Lime essential oil	3 g (about 30 drops)

Method

- 1 Cut the soap base into cubes and melt completely in a double boiler.
- 2 Pour the liquid base into two bowls, split roughly evenly.
- 3 Stir the green mica and lime zest into one bowl only; leave the other bowl plain white.
- 4 Let both bowls cool 2-3 min until they start to thicken, then whip each separately on high for 3-4 min until fluffy.
- 5 Whip half the foaming bath base into each bowl, then fold the coconut fragrance into the white bowl and the lime essential oil into the green bowl.
- 6 Spoon alternating dollops of each color into a jar and swirl once with a skewer.
- 7 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Lime essential oil can be phototoxic in leave-on products in direct sun, but since this soap rinses off in the shower, that risk doesn't apply here.
- This tropical pairing is a strong seller for summer and beach-themed gift sets.

Pink Clay Rose Whipped Soap

Active time 20 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (aloe vera)	186 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Pink Brazilian clay	6 g (1.5 tsp)
Dried rose petals, crushed	4 g (1 tsp)
Rose geranium essential oil	4 g (about 35 drops)

Method

- 1 Cut the aloe vera soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until fluffy.
- 4 Add the foaming bath base and whip 1-2 min more.
- 5 Fold in the pink clay a little at a time until the color is even, then fold in the rose petals and essential oil.
- 6 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- Pink clay gives a true dusty-rose color naturally, without needing added mica — a nice option if you prefer mineral colorants over cosmetic shimmer.
- This soft, clay-based bar pairs well as a gift alongside a glass dish or soap tray, since clay bars can soften faster if left sitting in standing water.

Unscented Sensitive Skin Whipped Soap

Active time	15 min active, plus overnight to firm
-------------	---------------------------------------

Batch size	about 8 oz (225 g)
------------	--------------------

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (fragrance-free, hypoallergenic)	197 g (6.9 oz)
Liquid foaming bath base (fragrance-free)	28 g (1 oz)

Method

- 1 Cut the fragrance-free soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 3-5 min until light and fluffy.
- 4 Add the foaming bath base and whip 1-2 min more to combine.
- 5 Spoon into jars right away and smooth the top with a spatula.
- 6 Leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- This is the simplest formula in the whole collection on purpose — no color, no fragrance, no inclusions — for skin that reacts to almost everything else.
- If you want to personalize it later, add fragrance or a gentle inclusion like colloidal oatmeal in small test batches first.

Birthday Confetti Whipped Soap

Active time 25 min active (plus time to prep confetti ahead), plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (clear glycerin)	188 g (6.6 oz)
Liquid foaming bath base	28 g (1 oz)
Rainbow soap confetti (small cut pieces of leftover colored melt-and-pour soap, cooled and firm)	12 g (about 2 tbsp)
Mild sweet-type cosmetic fragrance oil (cake-scented, not a food ingredient)	4 g (about 1/2 tsp)

Method

- 1 If you don't already have soap confetti on hand, melt small amounts of a few different colored scraps, pour thin and let set fully, then dice into small cubes.
- 2 Cut the main soap base into cubes and melt in a double boiler until fully liquid.
- 3 Let it cool 2-3 min until it starts to thicken at the edges.
- 4 Whip on high for 3-5 min until fluffy.
- 5 Add the foaming bath base and whip 1-2 min more.
- 6 Fold in the fragrance oil, then gently fold in the soap confetti pieces last.
- 7 Spoon into jars and leave uncovered overnight to fully set.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- The fragrance here is a skin-safe cosmetic fragrance oil with a sweet, cake-like smell — it is not a food item and shouldn't be marketed or treated as one.
- This is a fun option for kids' birthday party favors; keep the confetti pieces small so they don't feel chunky in the lather.

Autumn Harvest Piped Soap

Active time 30 min active, plus overnight to firm

Batch size about 8 oz (225 g)

Ingredients

INGREDIENT	AMOUNT
Melt-and-pour soap base (goat's milk)	188 g (6.6 oz)
Liquid foaming bath base	22 g (0.8 oz)
Orange cosmetic mica (swirled through, not a solid color)	1 g (1/8 tsp)
Cinnamon, clove and nutmeg spice blend fragrance oil	6 g (about 1.25 tsp)

Method

- 1 Cut the soap base into cubes and melt in a double boiler until fully liquid.
- 2 Let it cool 2-3 min until it starts to thicken at the edges.
- 3 Whip on high for 4-6 min — slightly longer and with a little less foaming base than usual — until it holds stiff peaks like whipped frosting.
- 4 Whip in the foaming bath base.
- 5 Drizzle the orange mica over the top and fold just once or twice, so it streaks rather than blends evenly.
- 6 Fold in the fragrance oil.
- 7 Transfer to a piping bag fitted with a large star tip and pipe rosettes directly into jars or onto a parchment-lined tray.
- 8 Leave uncovered overnight to fully set before moving piped rosettes into their final container.

Shelf life

6-9 months at room temperature in a sealed container, away from humidity.

Tips

- A stiffer whip (less liquid foaming base, a bit more whip time) is what lets the soap hold a piped rosette shape instead of slumping flat.
- If the rosettes lose their shape before they set, the mixture was whipped too loose — next time reduce the foaming base slightly or whip 1-2 min longer.
