Finish	Join with a sl st to the first st, fasten off and weave in the ends.	

Finishing

1. Weave in all the ends.
2. Slip the cover over the pot. It should hug the pot without stretching. The scalloped edge sits at the rim.
3. Take the plant out to water it, and let the pot drain fully before you put the cover back.

Tips

- To fit a different pot, measure the pot around the top (in inches) and multiply by 3.5 to get your stitch count (round to a multiple of 4, then adjust the growth rounds to reach it).
- Use cotton, not acrylic: it is easier to wash and it does not stretch out.
- Slip a bit of plastic wrap under the base of the cover if you set it on furniture, to protect the surface.
